Question 01:

1. Does SCE scope/design multiple undergrounding projects for a single circuit segment/circuit?

Response to Question 01:

Yes, SCE may scope and design more than one undergrounding project for a single circuit. Reasons for this approach could include the following:

- Different levels of risk across the circuit due to the nature of the terrain, vegetation, egress, and/or population
- Different levels of undergrounding timing and complexity due to factors such as mountainous terrain, underground routing needs, permitting requirements and lead times, and engineering complexity
